

Dear FCC,

Acting Governor Richard Codey of New Jersey sent me information to the effect that you are considering overturning our state's "DONOTCALL LAW". This law prohibits telemarketers from making phone calls to people who are on the "Do Not Call" list. So, FCC, is my response.

Please do not overturn New Jersey's "DO NOT CALL" law. Neither I nor my constituents -- I am the Republican West Ward (Newark) Chairperson -- are interested in having to listen to the garbage that telemarketers say on the phone. If you FCC guys were elected by the people, we would have been able to vote you out of office.

Those of your FCC employees who live in New Jersey, will have to listen to the telemarketers's garbage too. Generally speaking, I am sure they are not interested in that.

Telemarketers are interrupting people's daily routines, wasting precious time by their constant calling. I would rather receive junk mail in my postal box -- at least I can see what's being offered -- than listen to telemarketers's bullshit over the phone.

So, FCC, PLEASE DO NOT OVERTURN OUR DO NOT CALL LAW. People's privacy is more important than telemarketers's money.
